Entities and Relationships (FK Checklist Table)

Child table (entity)	FK column(s)	Parent table (entity)	Parent key	Relationship	On Delete behavior	Meaning
clothing_items	`user_id`	**users**	`id` / `user_id`	Many clothing_items → 1 user	(typically) CASCADE or RESTRICT	Each clothing item belongs to one user
clothing_items	`category_id`	**categories**	`category_id`	Many items → 1 category	(usually) SET NULL or RESTRICT	Item has one category
clothing_items	`brand_id`	**brands**	`brand_id`	Many items → 1 brand	**SET NULL** *(per the log)*	Item may have a brand; if brand deleted, item keeps but brand becomes null
clothing_items	`material_id` *(if used)*	**materials**	`material_id`	Many items → 1 material	SET NULL / RESTRICT	Item material
item_photos	`item_id`	**clothing_items**	`item_id`	Many photos → 1 item	CASCADE	Item can have multiple photos
item_colors (join)	`item_id`	**clothing_items**	`item_id`	Many-to-many via join	CASCADE	Assign multiple colors to items
item_colors (join)	`color_id`	**colors**	`color_id`	Many-to-many via join	RESTRICT / CASCADE	Color used by many items
item_seasons (join)	`item_id`	**clothing_items**	`item_id`	Many-to-many via join	CASCADE	Item can be worn in multiple seasons
item_seasons (join)	`season_id`	**seasons**	`season_id`	Many-to-many via join	RESTRICT / CASCADE	Season used by many items
item_occasions (join)	`item_id`	**clothing_items**	`item_id`	Many-to-many via join	CASCADE	Item fits multiple occasions
item_occasions (join)	`occasion_id`	**occasions**	`occasion_id`	Many-to-many via join	RESTRICT / CASCADE	Occasion used by many items

Entities and Relationships (FK Checklist Table)

Child table (entity)	FK column(s)	Parent table (entity)	Parent key	Relationship	On Delete behavior	Meaning
tags	`user_id`	**users**	`id` / `user_id`	Many tags → 1 user	CASCADE	Tags are user-owned (so "black-tie" can exist per user)
item_tags (join)	`item_id`	**clothing_items**	`item_id`	Many-to-many via join	CASCADE	Connect items to tags
item_tags (join)	`tag_id`	**tags**	`tag_id`	Many-to-many via join	CASCADE / RESTRICT	Tag used by many items
outfits	`user_id`	**users**	`id` / `user_id`	Many outfits → 1 user	CASCADE	Outfit belongs to a user
outfit_items (join)	`outfit_id`	**outfits**	`outfit_id`	1 outfit → many outfit_items	CASCADE	Items included in an outfit
outfit_items (join)	`item_id`	**clothing_items**	`item_id`	Many outfit_items → 1 item	RESTRICT / CASCADE	Same item can appear in multiple outfits
locations	`user_id`	**users**	`id` / `user_id`	Many locations → 1 user	CASCADE	Location is user-scoped (closet, drawer, etc.)
wear_log	`user_id`	**users**	`id` / `user_id`	Many logs → 1 user	CASCADE	A wear log entry belongs to a user
wear_log	`item_id`	**clothing_items**	`item_id`	Many logs → 1 item	CASCADE	Track when a specific item was worn
wash_log	`user_id`	**users**	`id` / `user_id`	Many logs → 1 user	CASCADE	A wash log entry belongs to a user
wash_log	`item_id`	**clothing_items**	`item_id`	Many logs → 1 item	CASCADE	Track when a specific item was washed

Entities and Relationships (FK Checklist Table)

Child table (entity)	FK column(s)	Parent table (entity)	Parent key	Relationship	On Delete behavior	Meaning
suggestion_requests	`user_id`	**users**	`id` / `user_id`	Many requests → 1 user	CASCADE	AI request made by a user
suggestion_requests	`season_id`	**seasons**	`season_id`	Many requests → 1 season	SET NULL / RESTRICT	Optional filter: season
suggestion_requests	`occasion_id`	**occasions**	`occasion_id`	Many requests → 1 occasion	SET NULL / RESTRICT	Optional filter: occasion
suggestion_requests	`color_preference` *(if FK)*	**colors**	`color_id`	Many requests → 1 color	SET NULL / RESTRICT	Optional preference color
suggestion_results	`request_id`	**suggestion_requests**	`request_id`	1 request → many results	CASCADE	Each request can return multiple outfit suggestions
suggestion_results	`outfit_id`	**outfits**	`outfit_id`	Many results → 1 outfit	SET NULL / RESTRICT	Suggested outfit reference (if outfit later deleted)
